# Benjamin Fazli

An ambitious developer, devoted to advancing society with innovative technology, striving to create lasting, transformative impact.

## Experience

### Software Engineer at Azwedo
2022 – Current

- In charge of development of Modular AI, an online Playground tool that allows converting any given page or site, or generating one with AI, to Webflow in seconds.

- Led and actively participated in the client back-end development, deployment, and maintenance of the Merrfal project, a cause that brings humanity back to life.

- Involved in the development of mini apps and their admin panels for content management. List of the apps: Ikonik for Figma, Ikonik for Canva, Ikonik for Webflow, Modulo, Goat Slider, Text Wizard AI, Svgflow, and LogoToUse.

- Developed an automation structure for an internal project, incorporating multiple platforms and automation through them.

- Managed and led a team in developing the entire backend and client-side infrastructure of Landdding, using GraphQL. And implementing a advanced cron structue for funcitonallity.

- Integrated Cvitae's client-side with React, handling states, UI, parsing, and data management including DevOps.

### Full Stack Developer Freelancer
2021

- Led the development of Dreampix, an AI wallpaper site for AI enthusiasts. The platform facilitates community-driven buying and selling of wallpapers and allowing users to download them.

### Full Stack Developer at CleanSoft
2020

- Developed a Web3 app digital marketplace with multiple panels for vendors to sell their products, facilitating real-time transactions using different cryptocurrencies.

### Full Stack Developer at Trokit
2019

- Developed a SaaS car management product, encompassing both front and back-end systems for garage management, while leading the product in the development process.
